Adobe Indexed PDF Collections

Adobe Indexed PDF Collections contain all the content in a particular release and provide an excellent method for searching for information offline. In addition to containing all the library PDFs, each collection includes an html page that lists all PDFs by title. Each collection, which is packaged as a Windows .zip file, is equipped with an Adobe Acrobat Catalog to provide a full text search mechanism for all content across the collection. To search the content, download the package, unzip the file, then open the included *.pdx file with Adobe Acrobat Reader. (Note that other PDF readers might work but were not tested.) You might need to accept a security warning and then switch to the Search window. Be sure to check out the advanced search options, too.

z/OS Introduction

An IBM Redbooks video course

by Paul Newton, Joshua Bennetone, Jenay Miller, Beth Shelly

This series of short educational videos teaches you about the IBM Z environment. The IBM Z mainframe is essential technology of large enterprises handling critical data and services every second of every day. While the IBM mainframe initially transformed business during past decades, IBM Z mainframe technology advancements provide limitless potential to enable future business transformation.

The IBM Redbooks video course starts from the beginning teaching IBM Z basics and the IBM Z flagship operating system z/OS. The course addresses z/OS access and interaction basics, data sets and data access methods, and operating system environment topics. No prior experience with mainframes and the IBM Z mainframe is necessary.
