

Licensed Program Specifications

CICS Application Migration Aid
Release 1
Program Number 5695-061

IBM* CICS Application Migration Aid can help application programmers to convert COBOL and assembler language programs from the macro-level application programming interface (API) to the command-level API, which is common across the CICS family.

Simpler macros are converted automatically, providing new source code with the equivalent command-level functions. More complex macros are partially converted, and guidance information is provided to allow the programmer to complete conversion. The original code is kept in all cases.

Specified operating environment

Machine requirements

CICS Application Migration Aid runs on any System/390* or System/370* processing system that supports MVS/XA* or MVS/ESA*.

Programming requirements

CICS Application Migration Aid will run on any IBM MVS/XA or MVS/ESA operating systems. To install it you need SMP/E Version 1 Release 4 or later. See the Program Directory for the required DASD storage requirements.

Licensed program materials availability

Restricted materials - Yes. This licensed program will be available with all licensed program materials designated as RESTRICTED MATERIALS OF IBM.

Supplemental terms

Testing period

Basic License - Two months.

Installation/location license

Not applicable. A separate license is required for each machine on which the licensed program will be used.

Usage license

Not applicable.

Type/duration of program services

Central Service will be available until December 30, 1993.

If you suspect a problem in the program, contact the IBM Support Center. If the problem has not previously been identified, you should then forward non-confidential documentation that demonstrates the failure (including the problem management record number) to:

IBM UK Laboratories, Ltd.,
APAR Processing,
CPSG MP204,
Hursley Park,
Winchester,
Hampshire,
SO21 2JN,
England.

APAR response will be as specified in the Programming Systems General Information Manual (PSGIM).

Warranty

This program is provided "As Is" as specified in the Agreement for IBM Licensed Programs.
